ASHVIN CHAUDHARY

BCA (HONS.) STUDENT

NETWORKING ENTHUSIAST

BCA (Hons.) student with a strong interest in computer networks, network security, and system administration. Eager to learn, design, and manage reliable network infrastructures and troubleshoot real-world issues.

TECHNICAL SKILLS

Networking Fundamentals

- OSI Model • TCP/IP • Subnetting & CIDR
- IP Addressing • VLANs • Routing & Switching

Routing Protocols

- Static Routing • RIP • OSPF (Basics)
- EIGRP (Basics) • BGP (Basics)

Network Services

- DNS • DHCP • NAT • NTP
- HTTP/HTTPS • FTP • SSH • SNMP

Network Security

- Firewalls • ACLs • VPN (IPsec)
- Port Security • Network Hardening

Operating Systems

- Windows Server (Basics) • Linux (Ubuntu/Kali)

TOOLS & TECHNOLOGIES

- Cisco Packet Tracer • GNS3 (Basics)
- Wireshark • Nmap • Putty • WinBox
- SolarWinds TFTP Server • VirtualBox
- Microsoft Visio (Network Diagrams)

CERTIFICATIONS

- Cisco Networking Basics
- Cisco Introduction to Cybersecurity
- Cisco Cybersecurity Essentials

EDUCATION

BCA (Hons.)

A.M. Patel Institute of Computer Studies, Ganpat University — **2025 – 2028**

Currently Pursuing (1st Year)

Higher Secondary (12th)	
Board	GSEB
Year	2025
Percentage	67%

COURSEWORK

- Computer Networks
- Operating Systems
- Data Structures & Algorithms
- Database Management Systems
- Cybersecurity Fundamentals
- Network Security (Basics)

PROJECTS

1 Enterprise Network Design – Campus Topology

- Designed a scalable enterprise network topology for a university campus.
- Implemented VLANs, inter-VLAN routing, and OSPF for dynamic routing.
- Configured DHCP, DNS, and NAT for smooth connectivity.
- Created network diagram and documentation.

Tech: Cisco Packet Tracer, OSPF, VLAN, DHCP, DNS, NAT

2 Secure Network with Firewall & VPN

- Built a secure network between two sites using IPsec VPN.
- Configured ACLs and firewall rules to restrict & allow traffic.
- Implemented NAT and port forwarding for internal services.
- Tested and verified secure remote access.

Tech: Cisco Packet Tracer, IPsec VPN, ACL, NAT

3 Network Monitoring & Traffic Analysis

- Captured and analyzed network traffic using Wireshark.
- Identified protocols, anomalies, and bandwidth usage.
- Generated reports to highlight issues and recommendations.
- Gained hands-on experience in troubleshooting.

Tech: Wireshark, TCP/IP, DNS, HTTP, ICMP

4 Home Lab Setup for Networking Practice

- Set up a virtual lab environment using VirtualBox and GNS3.
- Configured multiple routers, switches, and end devices.
- Practiced routing protocols, VLANs, and network services.
- Used the lab for hands-on learning and testing scenarios.

Tech: GNS3, VirtualBox, Cisco IOS, Kali Linux

ACHIEVEMENTS

- Completed multiple networking labs and simulations on Cisco Packet Tracer
- Solved 100+ networking related questions on various platforms
- Active learner on Cisco Networking Academy
- Consistently improving skills through hands-on practice and self-learning

HANDS-ON LABS & PRACTICE

- Configured VLANs, Trunks, and Inter-VLAN Routing
- Implemented Static, RIP, and OSPF Routing
- Set up DHCP, DNS, and FTP Servers
- Configured ACLs, NAT, and Port Forwarding
- Captured and Analyzed Traffic using Wireshark
- Performed Network Scanning using Nmap
- Practiced Linux Commands for Network Administration
